

Keson LLC is an alliance forged by the two families behind the Keson and the SOLA brands. The goal of this partnership is to provide professional tradespeople with the finest, most durable measuring and marking products possible.

Our combined 120 years of product development, engineering, manufacturing, and distribution to dozens of trades in 30+ countries, our commitment to listening and responding to feedback, and our uncompromising focus on service will continue to enable us to earn the trust of tradespeople and distributors.

This alliance builds on Keson’s U.S. manufacturing, existing distribution network, and strong relationships by adding SOLA’s European manufacturing, precision-engineering, and industry-leading technology. As a result, we are thrilled to bring you the most innovative, accurate, and easy-to-use measuring and marking products on the planet.

For years the spirit and screeding level industry in North America has lacked meaningful innovation. Keson LLC aims to change that by providing North America with two high-quality level brands.

G130, G150	Giant	Giant	Braided	1X

MEASURING CENTER PROMOTION

15% on \$750 or more of Tape Measures and Wood Rules.

SHORT AND LONG TAPES

PROFESSIONAL: High-impact, Keson-orange ABS housing with a full rubber grip for impact resistance.

TOGGLE: Toggle locking, brightly colored case is our second most numerous offering.

ULTRA BRIGHT: Easy to read and feature large print and high-contrast numbers. Double-sided blade offers vertical reading.

AUTO LOCK: Blade lock automatically engages. The tape retracts with the push of the button.

WIDE BLADE: Feature a 1-3/16 inch blade with bigger numbers and a standout up to 10 feet.

MAGNETIC TIP: Strong magnetic hook-end sticks to any metal surface.

ECONOMY SERIES: Co-molded plastic housing holds a lacquer-coated blade with easy-to-read markings and a side brake.

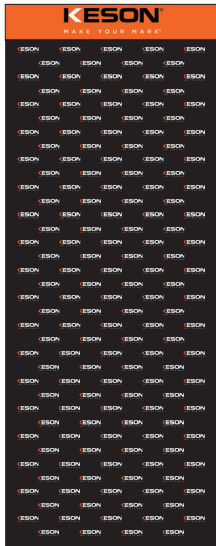

WOOD RULERS

Five wood rulers are available: Brass Extender, Engineers' scale, Metric scale, Brick Layers' scale, and Feet and Inches scales on both sides running opposite directions.

Short Tape Measures

With a lot of advertising and marketing it's difficult to get your hands around the return on your investment (ROI). With the Keson Private Label Program, you can. You get your brand in your customers' hands with every item they purchase and with every one you give away.

1. Choose your products.
2. Place order and submit your artwork to your representative, Keson Customer Service or email: private.label@keson.com.
3. While we mock up your items, (typically about 5 business days) plan how you'll use your newly branded products.
4. Approve the artwork.
5. Allow 5-7 weeks for delivery from date of artwork approval.

PENCILS

Pencils are available with black or red lead. We would be happy to help you design a pencil that promotes your business.

- Magnetic available

A screeding level is the best level for landscaping and concrete work. They are designed to use in leveling cement, sand or paving stones.

The Keson screeding level performs the same job as a screeding edge with the added bonus of a horizontal and vertical vial. As a result, the screeding edge can be used as a measuring tool like a spirit level. Our screeding levels ensure precise vertical or horizontal alignment.

Screeding Level

- Lengths: 39, 59, 78, 98, 118 & 39/78 combo available

Passion for Precision

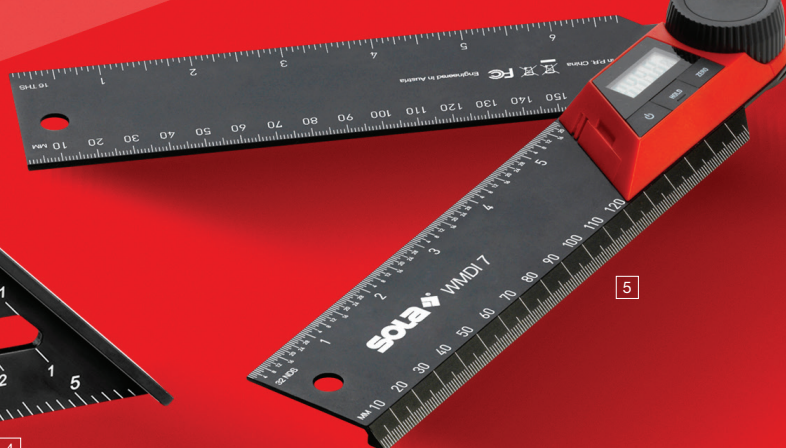

Product highlights

Practice makes perfect. That's also true for us.

4

5

1 BIG RED DIGITAL
Digital levels with Bluetooth

The BIG RED digital levels are ideal to use anywhere where inclinations, slopes and angles need to be measured quickly and precisely. These digital levels are highly precise, with an integrated electronic inclinometer module and Bluetooth interface to use with the SOLA Measures app.

2 CPM
Mechanical construction pencil

The CPM mechanical construction pencil with a wide, rectangular shaped lead, enables extremely accurate markings on various surfaces. Extend or retract the lead with the push of a button. The lead is available in different hardness grades and can be easily swapped out and refilled. The extremely durable plastic housing of the CPM is robust and was specifically developed for use on construction sites.

3 METRON 60 BT
Laser distance meter with Bluetooth

The METRON 60 BT enables measurements up to 200 feet (60 m) with up to $\pm 1/16$ inch (± 1.5 mm) accuracy. The device has nine measuring functions including measured value memory and is suitable for a diverse range of applications. With the integrated Bluetooth interface, measured values can be directly and wirelessly transferred to your smartphone via the SOLA Measures app.

4 RSI
Rafter squares

The RSI 7 and RSI 12 rafter squares with a durable T-edge on one edge combine all the features of a ruler, try square, miter square, angle meter, and a rafter measurer, and can even be used as a scribing tool and saw guide. They are ideal for marking and checking 45° and 90° angles, measuring angles between 0° and 90° , or for marking lines parallel or perpendicular to the T-edge. The special scales enable you to mark common, hip, and valley rafters.

5 WMDI
Digital angle finders

The WMDI 7 and WMDI 19 digital angle finders combine the functions of an adjustable square and ruler in one electronic measuring tool. The WMDI can be used to measure, transfer, and mark both internal and external angles. The digital LCD display makes it easy to read the measured values and provides an accuracy of $\pm 0.3^\circ$. The WMDI is available in 7-inch and 19-inch lengths.
