SOLA ®

Passion for Precision

Bring out the best in everything. Go one step beyond. Dare to do something great, to create something lasting. We will make the perfect tool so that you can do your best work. Since 1949 our passion for precision motivates us to manufacture highly accurate and durable measuring and marking tools used the world over. We don't know the meaning of the word "stop"! Every day, we develop and test innovations in our laboratories to inspire your skills and experience in your pursuit of perfection. We will support you every step of the way and give you exactly what you need to master your latest challenge. After all, there is always a new challenge around the corner. And what makes us proud is the pride you take in producing your very best work.

SOLA. Passion for Precision.

1949 – NT4 wooden incline spirit level

From a tiny attic to the great wide world.

Sometimes, great things really do come in small packages. The first NT4 wooden incline spirit levels were not manufactured in large factories, but rather in the small attic of engineer Guido Scheyer's home. Developed in collaboration with Sottopietra and Latzel, this first innovative tool shaped the spirit of the SOLA brand. It was produced in the same way that our measuring tools are manufactured in the main factory in Vorarlberg to this day – with an absolute passion for precision. That has never changed and never will, even as SOLA has grown since 1949.

2020 – BIG RED DIGITAL

Made in Austria: The home of innovation.

If challenged to name a country that's associated with long-lasting, reliable quality, Austria soon springs to mind.

Austria enjoys a reputation of manufacturing long-lasting, reliable quality products. There has always been a great demand to build high-quality products here. At SOLA, founded and operating in Vorarlberg, Austria, we have never shied away from this. At two sites in the Rhine Valley between Germany and Switzerland, we manufacture over 1,500 items. Every day, our team of around 200 employees works to ensure that "Made in Austria" continues to be synonymous with top quality and expertise. Our success in this mission is confirmed by our many customers, as well as the array of prizes and awards that SOLA products have received over the years.
New products

**Practice makes perfect.
That's also true
for us.**

2

1

2 R 100
Compact spirit level

At just 4 inches in length, the transparent R 100 pocket level has a number of practical features to help you conduct measurements in even the tightest spaces. Made from break-proof acrylic glass, the R 100 is resistant against water, heat, cold and is non-conductive. The R 100 has both a horizontal and a vertical vial and has a maximum measuring tolerance of 0.001 in./in. (±1 mm/m, 0.057°) for precise measurements. The R 100 is also suitable for simple measuring and marking tasks thanks to a printed ruler.

4 WMDI
Digital angle finders

The WMDI digital angle finders combine the functions of an adjustable square and ruler in one electronic measuring tool. The WMDI can be used to measure, transfer, and mark both internal and external angles. The digital LCD display makes it easy to read the measured values and provides an accuracy of ±0.3°. The WMDI is available in 7-inch and 19-inch lengths.

1 CPM
Mechanical construction pencil

The mechanical construction pencil CPM, equipped with reliable feed mechanism, sets new standards in terms of precision and reliability. The broad lead with a rectangular cross-section allows for exceptionally precise marking and delineation on various surfaces. The CPM leads are available in different degrees of hardness and can be easily replaced and refilled. The extremely durable plastic housing of the CPM is particularly resistant and designed for use on construction sites.

3 METRON 60 BT
Laser distance meter with Bluetooth

The METRON 60 BT enables measurements up to 200 feet (60 m) with up to ±1/16 inch (±1.5 mm) accuracy. The device has nine measuring functions including measured value memory and is suitable for a diverse range of applications. With the integrated Bluetooth interface, measured values can be directly and wirelessly transferred to your smartphone via the SOLA Measures app.

5 RSI
Rafter squares

The RSI rafter squares with a durable T-edge on one edge combine all the features of a ruler, try square, miter square, angle meter, and a rafter measurer, and can even be used as a scribing tool and saw guide. They are ideal for marking and checking 45° and 90° angles, measuring angles between 0° and 90°, or for marking lines parallel or perpendicular to the T-edge. The special scales enable you to mark common, hip, and valley rafters. The RSI is available in 7-inch and 12-inch lengths.

The FOCUS vial:
The benchmark for precise measurement.

At the heart of any SOLA spirit level is the patented FOCUS vial. Compared to conventional ring vials, it has a significantly better contrast and a magnifying lens that makes it easier to read. Its acrylic glass is break-proof and extremely stable against deformation; the anti-static and temperature-resistant vial fluid has very good light resistance and also prevents bubbling in case of shock.

The result: much faster, more precise measuring. A FOCUS vial can be easily read in every situation, at virtually any time – even in half-light – thanks to its luminous backing. And thanks to the patented ultrasonic welding, we even give you a Limited Lifetime Warranty for absolute tightness. That's how we do it at SOLA: if it's perfect for you, it's perfect for us.

- **4x higher contrast compared to ring vials**

- **Up to + 60% magnification for faster reading**

- **No split bubble in case of shock**

BIG RED
24"/61 CM

MADE IN AUSTRIA

SOLa
So accurate, the whole world knows about it.

We are proud to say that the BIG RED series spirit levels are the most accurate spirit levels in the world. With a maximum measurement tolerance of 0.0003 in./in. (0.3 mm/m, 0.017°) for standard measurements and 0.0005 in./in. (0.5 mm/m, 0.029°) for inverted measurements, there's no competition when it comes to choosing a tool for your next important job.

Extra weight makes light work of leveling.

Product development is anything but 'light work' – which is literally the case with the SOLA spirit level, which has a tangible weight of at least 0.42 lb/ft (630 g/m). The strong, shock-absorbing end caps are a further plus in terms of safety. The high degree of wall thickness protects the SOLA spirit level from daily wear and tear, or if it is dropped on the construction site. This minimizes inaccuracies.

Laterally installed magnets for secure adhesion.

A real SOLA stays where it should. That is because all magnetic SOLA box profile spirit levels have neodymium magnets installed on the side. This results in clear advantages in terms of precision, adhesive force, cleanliness, and safety.

Neodymium magnets are made of rare earth metals and guarantee a stable hold, regardless of whether the spirit level is positioned horizontally or vertically. Even for pipes and painted or round steel components, these magnetic spirit levels offer a secure hold with no slipping. That makes them ideal for any job where it helps to have your hands free.

The magnets installed on the side also work brilliantly in situations in which the spirit level is exposed to heat or vibrations. Due to the lateral installation method, the magnets can neither loosen nor be pulled out, and always remain stable.

Milled edges.

For best leveling results, our BIG RED levels come with only one milled bottom surface. By designing our levels around a single measuring surface, we are able to achieve our extraordinary accuracies.

Flat and clean measuring surface.

While the magnets are installed directly in the measuring surface of conventional magnetic spirit levels, installing the magnets on the side keeps the measuring surface flat. There are no inconvenient milling grooves on the measuring surface of the spirit level, in which dirt and metal shavings might gather. The flat measuring surface is easy to clean, prevents delicate, painted surfaces from getting scratched, and avoids damage caused by metal fragments sticking to the magnets.

Ideal for any situation:
BIG RED DIGITAL & GO! SMART

The BIG RED DIGITAL provides an outstanding performance wherever inclines, slopes or angles need to be determined quickly and precisely. The digital precision spirit levels impress not only with their integrated electronic inclination modules and Bluetooth interfaces, but also with their robustness and ease of use.

The GO! SMART combines the functions of a spirit level, an inclinometer and a protractor – an all-in-one, extremely practical device. Equipped with a magnetic base with a V-groove, this multi-use tool is compact and versatile.

SOLA Measures app:
A simple measure.

SOLA Measures is a multifunctional, digital, measuring app, which opens up an array of new possibilities. It can be connected via Bluetooth to a BIG RED DIGITAL spirit level, SOLA laser distance meter or GO! SMART, allowing the user to benefit from many useful functions on their smartphone:

· Measured values can be read remotely, if it is difficult or impossible to read them on the measuring tool.
· Measured values, as well as the date, time and location, can be recorded and managed.
· Photo overlay function captures the measurement situation, with display of real-time information (measured value, date, time) on the photo.

The free SOLA Measures app works with iOS and Android operating systems.

For more information, visit the SOLA YouTube channel

Laser distance meters

Measuring made easy.

For construction or renovation work; for indoor or outdoor jobs: SOLA laser distance meters are useful everywhere. A push of a button is all it takes to set up various measuring functions. With intuitive operation, distances can be measured or checked, and areas or volumes calculated in a matter of seconds.

Precision at the touch of a button.

The METRON 60 BT enables measurements up to 200 feet (60 m) with up to ±1/16 inch (±1.5 mm) accuracy. The device has 9 measuring functions including measured value memory and is suitable for a diverse range of applications.

Ready to meet all requirements.

The METRON 60 BT offers 9 measuring functions: length measurement, area measurement, volume measurement, min/max measurement, continuous measurement, indirect 2-point measurement, indirect 3-point measurement, addition/subtraction, and measured value memory (30 measured values).

Indirect 2-point measurement
For more information, visit the SOLA YouTube channel

Compatible with: METRON and the SOLA Measures app.

Do you need to record and save measurements on-site, or to send measurement data to the team? Do you need to precisely determine dimensions from construction site photos or for construction plans? No problem! The integrated Bluetooth interface enables the wireless transmission of measured values from the SOLA METRON directly to your smartphone. The free SOLA Measures app is the perfect tool, and also offers a variety of practical additional functions.

35
Squares

2-in-1: Digital angle finder and ruler.

The WMDI 7 and WMDI 19 digital angle finders combine the functions of an adjustable square and ruler in one electronic measuring tool. The WMDI can be used to measure, transfer, and mark both internal and external angles. The digital LCD display makes it easy to read the measured values and provides an accuracy of ±0.3°. The WMDI is available in 7-inch and 19-inch lengths.

For more information, visit the SOLA YouTube channel

Multi-talent for marking tasks.

The RSI 7 and RSI 12 rafter squares, featuring a durable T-edge, combine all the functions of a ruler, try square, miter square, angle meter, and rafter measurer. They can also be used as scribing tools and saw guides. These rafter squares are ideal for marking and checking 45° and 90° angles, measuring angles between 0° and 90°, or marking lines parallel or perpendicular to the T-edge. The special scales allow for joining regular, hip, and valley rafters.

WMDI

	L	P	PU	SKU	UPC
WMDI 7	**7 inch**	⌐⌐	4	WMDI7	9002719045090
WMDI 19	**19 inch**	⌐⌐	4	WMDI19	9002719045113

· High contrast LCD display for accurate digital angle measurements
· HOLD function for storing measured values and ZERO function for incremental measurements
· Manual blade fixation for precise transfer of angles
· Integrated end stop for accurate and reliable measurements
· Applicable as a ruler with continuous inch scale across both blades
· Robust, rigid blades with reinforcing ribs

Technical details: **WMDI**

Item description	Electronic protractor
Graduations	inch/mm, 2-piece, lasered
Measuring tolerance	0.30°
Blade material	Aluminum
Blade surface	anodized

Graduations	inch, 1-piece, lasered
Scale grid	1/8 inch
Angular dimension	45°, 90°, variable 0°–90°
Marking holes	1/4 inch

Pencils / markers

This is not 'just a pencil'. This is a really good pencil.

On tile/ceramic, metal, stone, or even wet wood – SOLA pencils write reliably. This is mainly due to the specific composition of materials in the lead, such as clay, graphite, and wax.

All SOLA pencils are made of high-quality linden wood, which makes the pencils very robust, but sharpening with a cutter or sharpener is still easy. The pencils are finished three times with high-quality lacquers. They are also environmentally friendly and free from toxic heavy metals.

TLM2 deep hole marker: Even at a distance.

One pencil, two functions: With the removable ABS attachment on, it is easy to write or draw with. Without the attachment, the TLM2 is a useful, precise deep drill hole marker, for depths of up to 1.7 inches (45 mm) or in hard-to-reach places. The TLM2 is equipped with a graphite HB lead as standard, but colored universal wax leads are also available.

CPM: Precision in every mark.

The CPM, a mechanical construction pencil, can be used for marking on various surfaces. The broad, rectangular HB lead makes precise markings on wood, paper, and cardboard. For rough surfaces like concrete or stone, harder 10H graphite leads are available. The CPM's lead can be easily replaced or refilled.

KESON®

Going even further together.

Nothing moves forward if you stay in one place. That is why we have also made a move in terms of our location. The SOLA brand has literally conquered the world! Today we are present in over 80 countries, and our close international partnership with Keson in the USA and the foundation of Keson LLC are shaping our present and our future.
