

## THIS MONTH'S REPORT

Happy Fall everybody! The season is turning and with the colder weather on it's way, we wanted to focus this month's newsletter on key products you need to get prepared for working in lower temperatures!

Earlier this year we officially expanded our coverage to include Quebec and Atlantic Canada.

Last month we made our first official trip to New Brunswick and PEI making stops in Fredericton, Saint John, Moncton and Charlottetown.

We had a blast meeting new customers and learning about their business'.

Thank you to everyone who warmly welcomed us. We look forward to growing with you in the years to come!
