

THIS MONTH'S REPORT

The year is off to a great start and this quarter is shaping up to be a busy one for our team. We have lots of exciting things coming over the next few months and look forward to continuing to share them all with you here!

We had a blast at the **World of Concrete** last month in Vegas. This is our second time attending the show and the scale of it still feels surreal! It was great to connect with so many of our manufacturers, customers and friends. We are already looking forward to seeing some of these same faces and a few more at this month's Canadian Concrete Expo.

UPCOMING EVENTS

Come check out our brands showcasing at the **Canadian Concrete Expo February 12-23 in Toronto, ON**. We will be exhibiting with: *Armorgard, Energizer, ISOtunes, KESON, SOLA, and PIP Canada*.

Armorgard is sharing their VIP code: **CCE456**, pre-register by February 11 @ 11:59 PM to skip the line and enjoy complimentary trade show admission: www.canadianconcreteexpo.com/vip/exhibitor-pass

EXCITING ANNOUNCEMENT

We are thrilled to share that **Energizer** has expanded our coverage to include the **Ontario Automotive channel**, including both Energizer and Rayovac battery brands, as well as the Armor All and STP family of products and more!

We are seeing a **significant industry shift in hardhat requirements**. Most general contractors are now mandating a **Type II, Class E hard hat with chinstrap**. **PIP Canada** offers a range of options that meet this new standard. Including our *Rocky Climbing* hat for individuals working at heights OR, any of our other compliant styles with the addition of our ***NEW*** magnetic chin strap. Questions on this change? Reach out anytime!
