

THIS MONTH'S REPORT

We had a great first trip to Newfoundland last month, visiting some familiar faces and meeting lots of new ones all across the province! **Thank you to everyone who took the time to meet with us** (especially during Moose season!!). We loved learning more about the market, and are already looking forward to our next trip back!

We visited *MK Morse* in Canton, Ohio last month alongside our long time Western Canadian friends from *Source One* and *Patterson Products*. Our team had an amazing experience learning about how our manufacturing process works and what makes our products unique. Interested in learning too? Reach out to schedule a demo on our cutting tools!
